

### Article 4 Nonattainment Area Rules; Dustproofing for Commercial Parking, Drives and Yards

#### 4-4-120. Objective Standards

An Owner and/or Operator shall stabilize any affected unpaved commercial parking lot surface such that:

A. [Silt Content/Silt Loading Limitations] Every unpaved commercial parking lot shall show compliance at all times with one of the following objective standards as assessed in accord with Article 9, §4-9-320.A:

1. Silt loading shall not exceed 0.33 oz/ft<sup>2</sup>; or
2. Silt content shall not exceed 8% for parking areas.

B. [Opacity Limitations] Observed opacity shall not exceed either of:

1. 20% Internal Opacity Limitation. For any fugitive dust plume caused by vehicular movement, a limit of 20 percent opacity based on an intermittent opacity method, as determined by the applicable test method of Article 9. See §4-9-340.D.; or
2. 0% Property Line Wind-Driven Opacity Limitation. The net opacity contribution from any unpaved commercial parking lot shall not violate a 0% opacity standard beyond the property line within which the emissions are generated for more than 30 seconds in any continuous six-minute period. For purposes of this limitation, opacity shall be determined based on a time-aggregation method. See Article 9, §4-9-340.F.
