

Apache Junction PM10 Nonattainment Area Construction Dust

Permits

Permit Types

1. Site permits
2. Block permits
3. Any site subject to a permit requirement under [Article 7, §4-7-234](#) will not be required to obtain an additional registration under [Article 3, §4-3-080](#).

Application Review

1. Following submittal of a complete application, including payment of any fee, the Control Officer shall within 10 working days approve, disapprove, or conditionally approve the permit application.
2. Upon approval of any permit, the provisions of any dust control plan submitted as part of the application will be part of the permit, and any commitments in the dust control plan will be enforceable under the permit.

Fees

Issuance of every permit will be subject to payment of a fee. [Click for Appendix C](#).

1. Construction permits will be assessed a fee based on project area.
2. Block permits shall be assessed a fee based on [Appendix C](#).
3. Late filing of applications are subject to the late filing fee.
4. Fee waivers are not allowed

Permit Duration

All permits will have a one-year permit term.

Site Permits

Renewals

Should a construction project last longer than the term of a permit, the permittee shall re-apply for a Dust Control Permit at least 14 calendar days prior to the expiration date of the original permit term. A single permit renewal may cover parcels that are no longer contiguous but were included within the original dust permit for the site. The renewal fee shall be based on the un-completed area of the project.

Right of entry and inspection

Any site covered by a permit is subject to an inspection without prior notice by the Control Officer.

Application signatures

Every application shall be signed by an individual, and that signature will confirm that the signer has authority to commit the named permit applicant (“Permittee”) to comply with all provisions within [Article 7, §4-7-234](#).

Applicability

1. Before development activity begins on a site that will involve a disturbance of an area of more than 0.1 acres, the Owner and/or Operator will apply for and obtain a site permit from the Control Officer.
2. The site permit will be maintained until all of the following occur:
 - a. Development activity has ceased
 - b. All disturbed portions of the site have been stabilized.
 - c. Closure of the site permit.

Apache Junction PM10 Nonattainment Area Construction Dust

Permit Closeout

1. An Owner and/or Operator may attain a project closure by obtaining from the Control Officer a written Approval of Certificate of Project Completion based upon showing final ground stabilization following completion of all development activity.

2. A permittee may terminate his liability by obtaining from the Control Officer a written Approval of Certificate of Project Completion, based upon the contractor's showing of:

- a. Final ground stabilization following completion of contracted project wide development activity;
- b. Other reasonable grounds (i.e. Termination of contractor's involvement with project).

3. An Owner, Operator and a permittee may terminate liability and obligation with respect to a specific lot or parcel with a development by complying with the terms of a Control Officer approved phased closure plan.

Area Block Permits

1. Nonattainment area Block Permits will only be available for earthmoving activity associated with:

- a. Maintenance of existing underground or above ground lines;
- b. Water connections, sewer connections, natural gas connections, electrical power connections, and communications connections.

2. Nonattainment area Block Permits will only be available to:

- a. Political subdivisions
- b. Public Utility Corporations regulated by the AZ Corporation Commission
