**INVITATION**

What: Invitation; Discussion of Architecture for a PM<sub>10</sub> Inventory System  
When: 9:30 a.m., February 13, 2009  
Where: Ocotillo Room, Pinal County Development Services, Building F, 31 North Pinal Street, Florence, AZ  
Information: Pinal County Air Quality, 520-866-6929

XX

**AGENDA**

1. Introductions
2. Objective:  

Define a system to allow recurring preparation of PM<sub>10</sub> emission inventories. The system should allow for spatial scaling, time-scaling and projecting future inventories. The system should both allow annual, daily and model-ready g./sec. output.

The system should provide for initial and continuing stakeholder input as to activities, activity levels, surface conditions, emission factors, and effectiveness of mitigation measures.
3. Interim-Activity Report
4. Technical issues
5. Inventory components
6. Task Force definitions
7. Timing issues
8. Action items
