Air Quality Proposed Rulemaking

Board of Supervisors Public Hearing

Pinal County Air Quality proposes that the Board of Supervisors rescind existing local rules pertaining to air quality control, namely the Pinal County Hazardous Air Pollutants (HAPs) Program and Appendix L. Procedures for Determining Ambient Air Concentrations for Hazardous Air Pollutants. The proposed rules rescission is in response to the Arizona Department of Environmental Quality (ADEQ) HAPs rules which were allowed to expire pursuant to A.R.S 41-1056(J). The Governor's Regulatory Review Council let the ADEQ HAPs rules expire in response to a legal challenge and subsequent State Superior Court ruling that the rules were unconstitutional. A formal notice, including the full text of the proposed rules rescissions are available online at <http://www.pinalcountyz.gov/AirQuality/Pages/Rulemaking.aspx> (notice posted online April 6, 2020).

This proposed rulemaking included a 30 day public comment period, a stakeholder meeting (held virtually on May 14, 2020) and a Control Officer Oral Proceeding held virtually on May 21, 2020.

The rulemaking proposal along with a summary of any comments received will be submitted to the Board of Supervisors for consideration and possible adoption. The date, time and location of the Board of Supervisors public hearing-of-adoption is July 1, 2020, 9:30 a.m. at the Pinal County Administrative Complex, Board of Supervisors Hearing Room located at 135 N. Pinal Street, Florence, AZ. 85132.
