Frequently Asked Questions about COVID-19

What are the symptoms for COVID-19?

People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms may have COVID-19:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

This list does not include all possible symptoms. [CDC will continue to update this list as we learn more about COVID-19.](https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html)

Monitor your child for COVID-19 symptoms every day

Pay particular attention to:

- Fever (temperature 100.4 °F or higher)
- Sore throat
- New uncontrolled cough that causes difficulty breathing (for a child with chronic allergic/asthmatic cough, see if there is a change from their usual cough)
- Diarrhea, vomiting, or stomachache
- New onset of severe headache, especially with a fever
